## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### **Abstract**

The abstract should be in narrative form and generally limited to a single paragraph within the range of 50 to 250 words. The abstract should not exceed 25 lines of text.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The alternate language "and/or" used in claims 1-5 is indefinite because it is unclear whether it is inclusive or exclusive in the limitation.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shofu (US Pat. No 4,184,194) in view of Detker (US Pat. No 3,694,945).

Regarding claims 1-6, the applicant is advised that claims have been given their broadest reasonable interpretation. In re Pearson, 181 USPQ 641 (CCPA 1974), Shofu discloses a display device consisting of: a vertical (reflector panel 16, fig. 2) opaque which is self supporting being affixed to a vertical surface (housing 10), a translucent panel (22, fig. 2) of approximately the same area of said opaque panel, support means (28, fig. 2) for affixing said translucent panel substantially parallel to said opaque surface or panel, directly in front of said opaque panel and at a predetermined distance between 1 and 185 millimeters from said opaque surface or panel, a light source (18, fig. 2). Shofu discloses the invention as claimed except for the translucent being a frosted acrylic sheet. However, Detiker discloses an optical element for illumination including a translucent, frosted acrylic sheet (2, col. 3, lines 1-6). It would have been obvious to an ordinary skill in the art at the time the invention was made to modify the display device of Shofu by substituting a frosted translucent panel in order to provide differing light effects in the dark when illuminated and in daylight when the light source is not in use.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stephan et al (2003/0064814), Cowell et al (US Pat. No. 6,662,503), Slesinger et al (US 2002/0085373 A1) all are cited of interest.
